find the prime number between 1 to 100 in different language like (python, java, r)

Sure! Here are the codes to find prime numbers between 1 and 100 in Python, Java, and R:

Python:

```python
def is_prime(n):
    if n <= 1:
        return False
    for I in range(2, int(n**0.5) + 1):
        if n % I == 0:
            return False
    return True

primes = [num for num in range(2, 101) if is_prime(num
print(primes)
```

Java:

```java
import java.util.*;

public class PrimeNumbers {
    public static boolean isPrime(int num) {
        if (num <= 1) {
            return false;
        }
```
